In response to the Office Action dated April 18, 2002, please amend the above-identified reissue application as follows:

IN THE CLAIMS:

Please add the following new claims 21-84.

21. An air intake system for controlling the flow of air into an internal combustion engine, the air intake system comprising an intake manifold having a bore wall defining a main bore for receiving airflow, the bore wall including a plurality of vanes extending into the main bore for reducing noise emanating from the intake system associated with airflow through the intake system.

22. An air intake system for a fuel injected internal combustion engine including a throttle body having a throttle valve for controlling airflow through a main bore in fluid communication with an air intake manifold wherein at least one of the throttle body and the air
